

Postpartum Family Planning Program Indicators

* Based on Investing In People indicator

** Based on PEPFAR indicator

	Indicator	Method	Definition	Numerator	Denominator	Frequency
	Service delivery					
1.	Number and proportion of service delivery points (SDPs) providing PFPF counseling or services*	Observation, supervision visits	<p>PFPF counseling includes discussion of client's past experience with FP, desire for spacing versus limiting and if any method preferred, healthy timing and spacing of pregnancies, interview regarding medical history, plans for breastfeeding, information on appropriate options, specific information on type, how to take, how it works, effectiveness, advantage and non-contraceptive benefits, disadvantages, common side effects, danger signs and where to go if any experienced, information STI/HIV prevention</p> <p>Number of service delivery points (excluding door-to-door CBD) providing PFPF counseling or services, <i>disaggregated, as appropriate</i>, by type of service: vertical FP/RH; HIV, incl. PMTCT; pre-natal/post-natal or other MCH; sites offering long acting and permanent methods (IUD, implants, voluntary sterilization)</p>	Number of SDPs where PFPF counseling and PFPF methods are provided.	Total number of SDPs	Quarterly
2.	Number of counseling visits for PFPF as a result of USG assistance*	HMIS	<ul style="list-style-type: none"> • PFPF includes FP counseling for women within one year postpartum • Number of visits that include counseling on PFPF. • Can include facility visits as well as contacts with CBD agents. • Disaggregate by facility counseling visits and counseling visits by CBD agents. 	Number of visits that include PFPF counseling	N/A	Monthly

3.	Number of SDPs demonstrating improved compliance with clinical standards for provision of PPF	Observations and simulations of provider-client interaction	Improved compliance refers to SDPs implementing standards-based quality improvement that achieve $\geq 80\%$ of PPF standards.	Number of SDPs implementing standards-based quality improvement that achieve $\geq 80\%$ compliance with standards.	Total number of SDPs implementing standards-based quality improvement.	Semi-annually
4.	Proportion of SDPs that have PPF client IEC materials	Observation, supervision visits	Client IEC materials such as brochures and posters are visible when observing the area and the stored inventory is sufficient to distribute to clients during a 3 month period.	Number of SDPs with PPF client IEC materials	Total number of SDPs	Quarterly
5.	Proportion of SDPs that have PPF job aids for providers	Observation, supervision visits	Provider job aids are being utilized by providers.	Number of SDPs with PPF job aids for providers	Total number of SDPs	Quarterly
6.	Proportion of SDPs that have implemented maternity pre-discharge protocol to include PPF	Observation, supervision visits	Proportion of SDPs that have PPF counseling, IEC and/ or method provision in the maternity pre-discharge protocol.	Number of SDPs that have PPF in the maternity pre-discharge protocol.	Total number of SDPs	Semi-annually
7.	Percentage of postpartum women that received IEC materials regarding PPF	Client exit interview	Proportion of PP women interviewed that report receiving IEC materials on PPF	Number of PP women interviewed that report receiving IEC materials on PPF	Number of PP women interviewed	Semi-annually
8.	Number/percentage of maternal health services clients at SDPs in program-supported areas who received counseling about PPF	Client exit interview	Proportion of PP women interviewed that report receiving counseling about LAM	Number of PP women interviewed that report receiving counseling about LAM	Number of PP women interviewed	Semi-annually
9.	Number/percentage of SDPs in program-supported areas which offer a range of appropriate contraceptive options for postpartum women	Direct observation	Proportion of SDPs that offer at least three FP methods appropriate for postpartum women and have at least a 3-month supply of IUD, POP, implants, condoms for PP women	Number of SDPs that offer LAM counseling and have at least a 3-month supply of IUD, POP, implants, condoms for PP women	Total number of SDPs	Semi-annually

10.	Couple-years-protection (CYP) provided by maternal, neonatal and child health (MNCH) program/	HMIS	The estimated protection provided by family planning services during a one-year period, based upon the volume of all contraceptives provided to PPFP clients during that period. The CYP is calculated by multiplying the quantity of each method distributed to clients by a conversion factor, to yield an estimate of the duration of contraceptive protection provided per unit of that method. The CYPs for each method are then summed over all methods to obtain a total CYP figure.	CYP calculation	N/A	Annually
11.	Number/percentage of SDPs in program-supported areas that offer PPFP integrated with other services, by type of service	Supervision visit	<ul style="list-style-type: none"> Integration can take many forms. Some examples include provision of PPIUCD prior to discharge from maternity ward, FP counseling during ANC, maternity admission, PNC visits Proportion of SDPs that have PPFP counseling, IEC, job aids, PP methods and a provider trained in PPFP working with PP women vertical FP/RH; HIV, incl. PMTCT; pre-natal/post-natal or other MCH; sites offering long acting and permanent methods (IUD, implants, voluntary sterilization) 	Number of SDPs that have PPFP IEC materials, job aids, PP methods and a provider trained in PPFP working in an area not designated solely for FP (e.g., maternity ward, HIV clinic, well-baby clinic, pediatric ward, etc)	Total number of SDPs	Semi-annually
Pre-service Education						
12.	Number of new health care workers who graduated from a pre-service (PSE) institution with strengthened PPFP**	Program records	Strengthened PPFP includes implementation of PSE standards-based management and quality improvement, installation of skills lab, providing clinical and teaching skills updates to faculty and preceptors, strengthening the clinical training sites ability to provide PPFP including space, equipment, supplies and implementation of standards-based management and quality improvement.	Count of new health care workers graduating from PSE institution with strengthened PPFP	N/A	Annually
13.	Number of PSE institutions implementing standards-based management and quality improvement including	Program records	"Implementing" includes development/ adaptation of standards to strengthen PPFP, training of PSE staff to implement process, completion of first assessment of PPFP standards, development and implementation of action plan to improve	Count of PSE institutions implementing standards-based	N/A	Semi-annually

	strengthening of PFPF		achievement of standards	management and quality improvement including strengthening of PFPF		
14.	Percentage of PSE institutions implementing standards-based management that demonstrate improved achievement of PFPF standards	Program records	"Improved achievement of standards" refers to achieving $\geq 80\%$ of standards	Number of PSE institutions that achieve $\geq 80\%$ of standards	Number of PSE institutions implementing standards-based management and quality improvement including strengthening of PFPF	Annually
15.	Percentage of PSE institutions with curricula updated including core PFPF competencies	Review of curricula	Curricula should explicitly identify core competencies and plan for	Number of PSE institutions with updated curricula including PFPF core competencies	Number of PSE institutions	Annually
16.	Number and percentage of faculty/ staff that have been trained in effective teaching and clinical skills	Program records	Count of faculty/staff trained	Number of faculty/staff that have been trained in effective teaching and clinical skills	Total number of faculty/ staff	Semi-annually
17.	Number of clinical training sites associated with PSE institutions demonstrating improvement in compliance with PFPF standards		"Improvement" refers to $\geq 80\%$ achievement of PFPF standards. Standards should address problems preventing quality PFPF provision including care processes, space, equipment, supplies.	Number of PSE institutions' clinical training sites that achieve $\geq 80\%$ of PFPF standards	Number of PSE institutions' clinical training sites implementing standards-based management and quality improvement including strengthening of PFPF	Annually

18.	Number of training institutions that have updated the pre-service program to include PFPF	Program report	PSE program update includes number of curricula developed, percentage of faculty trained, Number of PSE institutions that have updated training to include PFPF	Number of PSE institutions that have updated training to include PFPF	N/A	Annually
Training						
19.	Proportion of providers that know (includes methods and timing) PFPF methods		<ul style="list-style-type: none"> Proportion of providers trained by the program that know what methods can be utilized during the postpartum period, when, correct use, side effects and their management, complications, follow-up 	Number of providers trained by the program in PFPF that know what methods can be utilized during the postpartum period, when, correct use, side effects and their management, complications, follow-up	Total number of providers trained in PFPF by program	Semi-annually
20.	Proportion of SDPs with at least one provider trained in PFPF	Observation, supervision visits	<ul style="list-style-type: none"> Proportion of SDPs with one provider trained in PFPF 	Number of SDPs with one provider trained in PFPF	Total number of SDPs	Semi-annually
21.	Number of people trained in PFPF with program funds*		<ul style="list-style-type: none"> Number of people (health professionals, primary health care workers, community health workers, volunteers, non-health personnel) trained in FP/RH (including training in service delivery, communication, policy and systems, research, etc.) 	Number of people trained in PFPF with program funds*	N/A	Quarterly
Community mobilization						
22.	Number of community mobilization activities including PFPF conducted	CHW report	<ul style="list-style-type: none"> Community mobilization activities can include: home visits, community meetings, health fairs, etc 	Number of community mobilization activities with focus on PFPF conducted	N/A	Quarterly
23.	Proportion of community health workers (CHWs) trained in PFPF	Program report and CHW records	<ul style="list-style-type: none"> Proportion of CHW trained in PFPF (screening, referral, method provision where approved) 	Number of CHW trained in PFPF	Total number of program-supported CHW	Quarterly

24.	Proportion of CHWs providing PPFP interventions	Program report and CHW reports	<ul style="list-style-type: none"> Proportion of CHW providing PPFP (screening, referral, method provision where approved) 	Number of CHW providing PPFP	Total number of program-supported CHW	Quarterly
25.	Number of community-based volunteers providing PPFP information and referral	Program report	<ul style="list-style-type: none"> Number of community volunteers providing PPFP screening, information and referral 	Number of community volunteers providing PPFP screening, information and referral	N/A	Quarterly
26.	Number of people that have seen or heard a specific program-supported (PP)FP/RH message*	Population-based survey	<ul style="list-style-type: none"> Size of target population that has seen or heard a specific FP/RH message 			
27.	Number of individuals in program-supported areas who participated in behavior change interventions, by intervention type	Program report	<ul style="list-style-type: none"> Number of individuals that participated in community events, theater, group counseling, etc 	Number of individuals in program-supported areas who participated in behavior change interventions, by intervention type	N/A	Semi-annually
Health systems strengthening						
28.	Proportion of SDPs that have a functional PNC register that includes PPFP with program support	Program report	Register is fully filled out with information about clients, including PPFP counseling provided and method adopted	Number of SDPS that have a functional PNC register that includes PPFP	Total number of SDPs	Semi-annually
29.	Number of supervision tools developed or updated with program support that include PPFP	Program report	Number of supervision tools developed or updated with program support that include PPFP	Number of supervision tools developed or updated with program support that include PPFP	N/A	Annually

30.	Proportion of SDPs with referral system that links women delivering in SDPs and communities to FP services	Program report	Referral system includes documentation of clients received by referral and of those that are referred, communication between community referral agents and the facility to support continuity of care	Number of SDPs that have a referral system to link women delivering outside of the facility to PFPF services	Total number of SDPs	Annually
Supportive environment						
	Indicator	Method	Definition	Numerator	Denominator	Frequency
31.	Number of improvements to PFPF laws, policies, regulations, protocols or guidelines related to improved access to and use of health services drafted or changed with program support *	Program report	Number of laws, policies or guidelines developed or changed to improve access to and use of PFPF services	Number of laws, policies, regulations, protocols or guidelines developed or changed to improve access to and use of PFPF services	N/A	Annually
32.	Number and proportion of in-service training packages on FP and/ or MNH that have been updated to include PFPF at national level	Program report	Number of IST packages that have updated training to include PFPF	Number of IST packages that have updated training to include PFPF	N/A	Semi-annually
